

Treff 2011

Friz Treff 2011 - Homag Treff 2011 - For the first time common performance in Schopfloch

For the use of synergies and increasing of the efficiency we decided to organize the FRIZ Treff of this year with our parent company at HOMAG in SCHOPFLOCH. As usual you can enjoy our approved machines in new ambience.

- Extension of the surface competence
- **reacTec** for profile wrapping machines
- Laminating technology in plant sectors and system solutions

Place

HOMAG Holzbearbeitungssysteme GmbH
Homagstraße 3 - 5
72296 SCHOPFLOCH

Opening hours

27th - 30th of September daily from 9 a.m. - 5.p.m

We look forward to meeting you!

Invitation

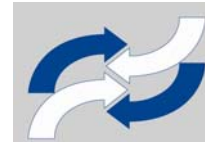

Schopfloch

Landkreis Freudenstadt

Weinsberg

Landkreis Heilbronn

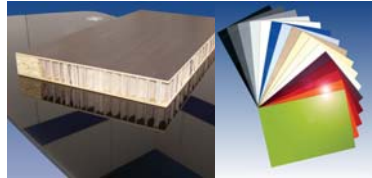

FRIZ Treff in Schopfloch

27th - 30th September 2011
daily from 9 a.m. to 5 p.m.

Surface technology

Creative system solutions extend your fields of applications

Optimat FKW 100
High gloss laminating

- > High-quality surface laminating for an entry level price with highly flexible production possibilities
- > Various core materials e.g. chipboard, MDF, HDF, honeycomb panels, multiplex and multi-layer boards, plaster boards, OSB, plastic or components for sandwich elements
- > Usage of different surface materials on rolls and in sheets e.g. HPL, CPL, thermoplastic foils (PET, PP, PS, PVC, etc.), veneer, decorative papers secures a very high product diversity
- > Combi-Glue application machine for use of PVAc dispersion glue and PUR-Hotmelt for reduction of the production costs - depending upon application

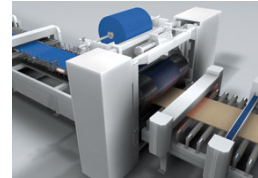

Profi PUM 310/30/DK/R
Window profile wrapping

- > Innovative machine concept for the economic wrapping of plastic or metal profiles e.g. PVC window profiles
- > Process-security processing of solvent-free and VOC reduced primers
- > Constructional solutions for reduction of setup times and increasing of operational availability
- > Minimization of the foil waste

ReacTec -
Laminating & wrapping technique

- > Surface laminating in a two-step application process using a thermal reactivation by a heated pressing calander
- > Profile wrapping in the inline process for application weights of min. 20 g/m² - costs saving!
- > Best surface quality with thinnest coating materials
- > No chip swelling by missing ingress of moisture
- > Formaldehyde and emission-free adhesive joint
- > Excellent surface hardness because of pressure
