Success through partnership and strategy

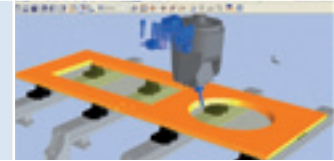

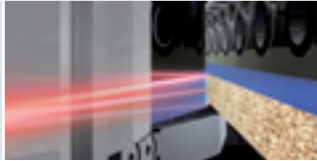

Invitation

HOMAG Treff September 28 – October 1, 2010

50

50 years HOMAG

Our celebration – your benefit

The HOMAG Group has been your competent partner for woodworking plants and machines for 50 years.

Your trust, your valuable impetus and your cooperative partnership form the basis for developments designed to sharpen your competitive edge.

We would like to use the occasion of our 50-year jubilee to say „thank you“ with our 50-year edition series: A selection of specially chosen products with a unique celebration price tag. For details, go to www.homag.com/edition.

Experience HOMAG live, find out more about our impressive range of machines, plants, software and services straight from the experts.

We look forward to welcoming you.

Innovation working for your success

laserTec heralds the dawn of a whole new era in edge processing:

- > Top quality coupled with extreme handling simplicity and reduced costs.

Resource efficiency

Environmental protection which makes perfect economic sense. We are working to continuously improve the resource efficiency of our machines. This means that with every new investment, you save hard cash and sharpen your competitive edge.

Machines and plants

Flexible processing centres

- > Product design „unlimited“ using 5-axis technology
- > Economical shaped component edging with the **powerEdge** gluing unit
- > Unit cost reduction through automatic workpiece handling

New edge banding machine KFL 300 with sizing section

- > Single-sided combination machine with automatic workpiece circulation
- > The entry into precision sizing and edge banding
- > Rolling block link chain for optimum workpiece transport
- > Economical industrial-scale production

PRACTICE Products for woodworking shops

AMBITION edge banding machine – All-inclusive models to meet any requirement

- > Edge banding machines for every type of edge
- > New profile trimming unit FF32 for automatic edge finish processing

Processing centre Venture 13

- > Edge banding with the **easyEdge** gluing unit
- > 5-axis functionality with the FLEX5+ unit

New gantry processing centre BMG 600

- > Machine bed made of low-vibration material SORB TECH for - optimum processing quality - Long tool service life
- > Processing height 500 mm for processing 3D workpieces
- > 5-axis spindle for high flexibility and investment security

Practically-oriented services

woodWOP 6.0

Simple programming and greater safety with three dimensional workpiece views

collisionControl

Effective protection of machines and operating personnel with in-process collision monitoring.

Monitoring & Reporting

Systematic acquisition and evaluation of machine data for greater productivity and higher output volume.

HOMAG service package

Customized services to maintain value and enhance availability.

HOMAG Engineering

Your system supplier for professional planning, implementation and follow-up services from the production cell to the complete factory.
