

## Homag eSolution GmbH

### Joining forces for more expertise

Homag Group AG, Schopfloch and imos AG, Herford, have formed a new enterprise - Homag eSolution, providing software solutions for furniture production - tailored to Homag Group machines and equipment.

The decisive factor in Homag Group AG's choice of imos AG as partner for the new enterprise was the longstanding close cooperation based on mutual trust with the Herford software specialist. imos is considered by the industry to be one of the leading IT providers with regard to linking machine technology to IT systems and implementation of an uninterrupted data flow within a company.

Homag eSolution addresses the symbiosis of machine and software from a new, holistic dimension of a groundbreaking nature within the industry. Active support is provided to customers in the furniture and interior design sectors as well as the construction element industry in using software-based solutions to optimise their business processes. In addition to classical CAD/CAM products, the focus is on integrated software solutions for sales and production planning. imos AG provides the core technology, customised by Homag eSolution both for Homag products and Homag customers.

Homag's CEO, Rolf Knoll says, "imos' software solutions are widely

accepted in the furniture industry worldwide, from America to Asia. This makes imos the ideal partner for Homag Group AG."

imos' CEO, Prof. Dr. Frank Prekwinkel says, "We are pleased to be able to combine our expertise with that of the leading manufacturer of machines for furniture production. In other words, we are joining forces with Homag to put the development of pioneering solutions onto a completely new basis."

"We think in terms of systems - staying ahead of our customers' needs", explains Achim Gauss, Homag's Chief Technical Officer. "Homag eSolution allows us to expand our expertise as a system supplier even further. In future we will be even better equipped to provide upstream software systems for cabinet shops, SMEs and industrial enterprises in addition to machines, production cells and lines. Our objective is to further increase the "intelligence" of our machines. This enables our customers to perfectly meet the changing demands of the market at all times."

## Weinmann Holzbausystemtechnik GmbH

### Innovative solutions for timber frame manufacturers

In 1985, Weinmann started out as a small engineering company. Today, Weinmann is one of the leading manufacturers of modern, powerful machinery, equipment and systems for timber houses. Weinmann offers innovative solutions for the construction of prefabricated wooden house structures. Weinmann offers the basic machinery and the technology needed to build the wooden structures

Since the beginning, Weinmann has focused on developing innovative products with market and customer-oriented product design. It is not a coincidence that some of the most modern timber frame house building companies work together with Weinmann machines. More and more carpenters and industrial companies trust in the quality, product performance and consulting provided by Weinmann.

### Products Offered:

Weinmann offers machines, plants and systems for the for innovative house construction-for efficient production of wall, gable, roof and

ceiling elements. The product spectrum ranges from assembly tables and butterfly turners for carpentry workshops through multifunction bridge to fully automated CNC controlled large scale plants for industrial production.

### Weinmann Offers:

- Machines
- Software
- Services
- Solutions

The different types of machines offered include beam and processing machines, and machines for element production and handling.

Weinmann software solutions guarantee a safe investment because they are highly compatible and perfectly adapt your machines. You optimise the availability and productivity of your production lines and satisfy the highest demand for individuality and efficiency.

Whether service, training, consulting, financing or documentation - Weinmann provides the best solutions for its customers. Weinmann production lines are designed as modular. Drawing on a sophisticated system module, we provide with a range of proven and reliable components - for solutions which are tailored to customer needs.
