

WEINMANN Treff 2011: The trade meeting for the field woodworking "Compact and flexible solutions for the entire timber construction" in St. Johann - Lonsingen

Individuality and flexibility will be emphasised!

From 27th to 30th September 2011 visitors can take a look at the complete spectrum of this line of business, ranging from small trade to industry. WEINMANN presents the latest compact and flexible solutions for timber construction - amongst others the new combi wall system the WEK 100 for timber frame element production, the joining multitasker WBZ 160 flexLine, the new carpentry table WTZ 110/10 LE for manual construction of frame work for the production of elements which are highly accurate (dimensions and angles), the new high speed linear saw WBS 140, which is equipped with a tool changer and the fully automated processing center for solid wood elements WMP 240, offering 5-axis processing. The high accuracy and processing speed as well as the unique safety technology can be intensely viewed during the Weinmann Treff. Furthermore each day various interesting lectures on frame house construction will take place.

During this meeting of the industry sector 'frame house processing' visitors can watch the production, assure themselves of the great operator convenience and they have the opportunity to get some individual expert advice.

Everything about "The House"

The lecture program of the current year for the WEINMANN Treff is formidable. Many different subjects concerning house construction will be

covered by independent experts and customers. This includes projects like "The new low-energy house" as well as state-of-the-art insulation and massive wood working technologies and many other practice-oriented topics.
