**SCHULER MCS edition**

from **48,550.-€\***

**Modules and performance**

- Basic order processing module including AutoCAD-based 3D graphics
- Manufacturing module with manufacturing documents and provision of machine data
- Materials logistics, finance and CRM based on Microsoft Dynamics NAV
- For 2 users
- 30 service days for installation, training and coaching\*

\* plus travelling and accommodation expenses. The service requirement must be determined on a project-specific basis.

**Highlights**

**Intelligent product configurator**

- Generates complete, technically validated data for order processing and production already at the order entry stage

**Integrated 3D graphics**

- Visualizes customer requirements, enhancing safety and quality through visual checks

**Innovation and investment security**

- Through industry-specific modules from the HOMAG Group and standard ERP functions from Microsoft Dynamics NAV

**What SCHULER MCS edition has to offer**

**Industry-specific order processing**

- Accurate, high-quality data through automatic validations, plausibility checks and price determination at the order entry stage
- Convenient processing of custom-made products
- Fast generation of commercial documents such as quotations, order confirmations ...
- Requirements and deadlines for manufactured, stock and purchased parts are available via mouse click

**Industry-specific manufacturing**

- Automatic generation of manufacturing documents and machine data
- Optimum support for special requirements arising from grouping and sorting processes in furniture manufacturing
- Convenient master data maintenance even with a multi-variant product range

**Standard ERP functions**

- Processes without industry-specific requirements such as materials logistics, finance and CRM utilize modules of the business software Microsoft Dynamics NAV
- Industry-specific modules and standard ERP modules are integrated into a single system, work seamlessly together and generate a high degree of transparency
